ning of each regular issue of the PCT Gazette.*

(54) Title: PACKAGING COVER AND BOX

(57) Abstract: Described is a cover (1) for closing a container (2), at least consisting of an upper surface with side edges, wherein the upper surface with side edges comprises at least one folding seam (3) which gives the cover a pivoting effect. The side edges (4) of the upper surface of the cover particularly comprise one or more snap closures. When such a cover is snapped onto a container suitable for the purpose there is then created between the cover and the container an opening through which entry and exit of air can take place. Thus is prevented that holes have to be arranged for this purpose in the cover and/or container an opening (7) through which entry and exit of air can take place.

WO 2004/069509 A3

A. CLASSIFICATION OF SUBJECT MATTER  
 IPC 7 B65D43/16 B65D85/34 B65D51/16

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

IPC 7 B65D

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

EPO-Internal

\* Special categories of cited documents:

- \*A\* document defining the general state of the art which is not considered to be of particular relevance
- \*E\* earlier document but published on or after the international filing date
- \*L\* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- \*O\* document referring to an oral disclosure, use, exhibition or other means
- \*P\* document published prior to the international filing date but later than the priority date claimed

- \*T\* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- \*X\* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- \*Y\* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- \*G\* document member of the same patent family
